### Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

#### CANSIM Division

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-8203) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192

## PREFACE

CANSIM<sup>\*</sup> is Statistics Canada's computerized data bank and information retrieval service. It provides detailed and timely statistical information to economists, sociologists, statisticians, planners, analysts and academics in both the private and public sectors.

The CANSIM central facility is comprised of three database systems which may be accessed from anywhere in Canada by terminal. Business, economic and some social statistics are available in time series format on the Time Series Base. Economic and social statistics are available in cross-sectional format on the Cross-Classified Base (XCL); this format shows data in their multi-dimensional relationship with other data over time. Census Summary Data for a variety of geographic areas are available on the CANSIM Summary Data System (CSDS).

The CANSIM Mini Base is a subset of approximately 25,000 time series of the CANSIM Time Series Base, and is available via terminal from Secondary Distributors<sup>\*\*</sup>. All Secondary Distributors must provide this subset at a minimum. Secondary Distributors may also obtain additional series from the CANSIM Main Base. Such series are referred to as Mini Base supplementary series. Users are encouraged to discuss obtaining supplementary series with their Secondary distributors. To provide users with an indication of the kinds of data available on the CANSIM Main Base, the Table of Contents and Index to the CANSIM Main Base Series Directory are included as an appendix to this document.

The CANSIM Mini Base is updated on all working days excluding federal government holidays. It contains a dummy series, databank identification number A100, which users may employ to determine the timeliness of the base. This series contains three datapoints.

(1) the year, month and day (YYMMDD) of creation of the previous daily update file.  
(2) the year, month and day (YYMMDD) of creation of the current daily update file, and  
(3) the time the update file was loaded on the System of the Secondary Distributor.  
For all series on the CANSIM Mini Base, the updates will be available within one working day of their release on the CANSIM Main Base. Secondary Distributors disseminate CANSIM data according to Statistics Canada guidelines and offer users a choice of software, telecommunication networks and technical support services.

---

\* CANSIM is an Official Mark of Statistics Canada.

\*\* A complete list of Secondary Distributors is on the following page.  
When publishing any statistical data or text retrieved from CANSIM, the following credit should be used:

#### GUIDE TO USE OF THE TABLE OF CONTENTS, INDEX, AND DIRECTORY

An intrinsic property of the CANSIM Mini Base is that the data are organized according to a hierarchical structure - the highest level of which is the data matrix. Each of the matrices on the Mini Base contains individual series, which are related to each other in some coherent fashion. Each series represents a concept or variable for which data are stored across time.

The Mini Base Series Directory, the large-volume, series level presentation of the database content, has as its primary level of aggregation the data matrix. Within it, matrices are simply ordered in ascending sequence and not placed in the context of subject matter categories. The Mini Base Series Directory outlines, for each matrix, the Matrix Title and Note and, when applicable, the source publication for the data. For each constituent series, it provides the CANSIM series identification number, the databank number, start date, security status, and termination and metric conversion indicators-all in a format designed for easy reference.

The Index to the Mini Base outlines the contents of the Directory by these matrices - specifically, as they are organized by twelve broad subject categories. The link between the Index and the Main Base Series Directory is the matrix number.

The Table of Contents lists the twelve subject categories of the Index.

To determine whether data of interest are contained in the CANSIM Mini Base, the user is encouraged to begin with a review of the Table of Contents. If the Table of Contents provides evidence that data of interest may be available, the user is directed to the pages of the Index which outline the matrices that might apply. Subsequently, matrices which are identified as warranting investigation of their component time series would form the basis for referring to the CANSIM Mini Base Series Directory.

#### Example 1:

##### Finding CANSIM Mini Base Series

You wish to obtain monthly data for the Consumer Price Index for Toronto and Montreal. You would begin with the Table of Contents for the Mini Base. From there you would establish that Section II of the Index contains data on Prices and Price Indexes and that Section II can be found on page 2. By turning to this page of the Index you would determine that matrices 1923 through 1940 contain monthly Consumer Price Indexes for Canadian cities and that matrices 1930 and 1928 respectively contain city indexes for Toronto and Montreal. Finally, by turning to Matrices 1930 and 1928 in the Mini Base Series Directory you would be able to review the content of each of the matrices and determine the precise series which would suit your needs.

#### Example 2: Finding CANSIM Mini Base Supplementary Series

A more complex example would have you seeking data about the production of Asphalt Roofing. A review of the Table of Contents would direct you to Section IV of the Index - Manufacturing. However, Section IV contains no reference to the production of Asphalt Roofing. You would then refer to the Appendix wherein the Table of Contents and Index to the CANSIM Main Base are presented. A review of the Table of Contents to the CANSIM Main Base directs you to p. 41 of the Index. Miscellaneous Manufacturing Statistics. There you determine that CANSIM does contain data on the Production and Shipments of Asphalt Roofing and that it resides in Matrix 32 of the Cansim Main Base.

You must now contact your Secondary Distributor and discuss the potential of gaining access to Matrix 32 (or a subset thereof) via CANSIM Mini Base Supplementary Series service.

## II. PRICES AND PRICE INDEXES

### CONSUMER PRICE INDEX-UPDATING BASED ON 1982 EXPENDITURES

Beginning with January 1985 the Consumer Price Index (CPI) will be compiled using updated weights obtained from the 1982 Family Expenditure Survey. These weights will replace those derived from the 1978 Survey which were used in the CPI during the period April 1982 to December 1984.

To maintain the continuity of the series for the All-items index for Canada and for published urban centres as well as for other indexes representing varying levels of aggregation, the indexes produced using the 1982 weights are linked (or chained) to their respective counterparts obtained from the 1978 weights. December 1984 marks the link month, or the point in time, in which comparable indexes are merged.

The time reference base continues to be 1981=100 except in cases of indexes that were initiated after that time. In particular indexes for Whitehorse and Yellowknife will continue to be reported on a March 1982=100 time base. Victoria, the newest urban centre for which data will be published, will have a time base of December 1984=100.

Further details on the Consumer Price Index and related information may be obtained by dialling 613-990-9606 or by writing to the Unit Head, Information and Current Analysis Unit, Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

## VI. CONSTRUCTION

National Wealth and Capital Stock

## 1. 1970 SIC

These series represent annual estimates of the stocks and flows of fixed non-residential capital in Canada beginning with the year 1926. The data from 1926 are published in Fixed Capital Flows and Stocks, (13-568), occasional. Updates for the five most recent years are published in Fixed Capital Flows and Stocks, (13-211), annual.

The perpetual inventory method which underlies the present estimates starts with annual investment expenditures and estimates of the service lives of the assets. The capital stock estimates for a given year are obtained by accumulating past investment expenditures and adjusting them for the value of investment that has been used up (gross stocks) or adjusting them for the gradual wear and tear and the obsolescence they undergo during the time they are used (net stocks).

A comprehensive description of the perpetual inventory method is given in Fixed Capital Flows of the perpetual inventory method is given in Fixed Capital Flows and Stock - Manufacturing Canada 1926-1960: Methodology (13-522), Occasional.

The series are given by major industries according to the 1970 S.I.C., both in constant (1971) and current dollar valuation covering the following detailed types of components:

1. Building Construction
2. Engineering Construction
3. Machinery and Equipment
4. Capital Items Charged to Operating Expenses
5. Total Components

The component series are presented for the following categories of data:

1. Gross Fixed Capital Formation (GFCF)
2. Net Fixed Capital Formation (NFCF)
3. Capital Consumption Allowances (CCA)
4. Mid-Year Gross Stock (MYGS)
5. Mid-Year Net Stock (MYNS)
6. End Year Gross Stock (EYGS)
7. End Year Net Stock (EYNS)
8. Discards

Note:

The mnemonics appearing at the end of the series title of some 650 series in the Capital Stocks data block, serve to identify the component series of the CANDIDE model which is an undertaking of the Economic Council of Canada.

B. Capacity Utilization Rates In Canadian Manufacturing

The capacity utilization rates are given by major group according to the 1970 Standard Industrial Classification, by quarter from 1961.

The definition of capacity in this procedure is the maximum output obtainable under normal technological and market conditions.

The methodology used to produce these indexes is based on a comparison of the actual output of an industry during a certain time period with the estimated capacity output during that period.

The estimated capacity output is based on a capacity capital-output ratio derived from the industry's gross stock of fixed capital, measured in 1971 dollars. These capital stock estimates are produced by the National Wealth and Capital Stock Section of The Construction Division of Statistics Canada.

For concepts and detailed methodology, refer to Utilization Rates in Canadian Manufacturing, (31-003), Quarterly.

These indexes are available for the following list of industry levels:

1. Food and Beverages
2. Tobacco
3. Rubber and Plastics Products Industries
4. Leather
5. Textile
6. Knitting Mills
7. Clothing
8. Wood
9. Furniture and Fixtures
10. Paper and Allied Industries
11. Printing, Publishing and Allied Industries
12. Primary Metals
13. Metal Fabricating
14. Machinery
15. Transportation Equipment

C. I. Private and Public Investment in Canada, Intentions (61-205), Annual

The matrices listed below contain series representing Actual data for Capital and Repair Expenditures. For Mid-Year Forecasts see Private and Public Investment in Canada, Revised Intentions (61-206), Annual. The actual matrices begin in 1956, the Preliminary Actual and Forecast begin in 1973. The last two years in Actual matrices are current Preliminary Actual and Forecast.

The matrices for the provinces and territories also include data split between the private and public categories for Actuals beginning in 1963, Preliminary Actuals in 1976 and Forecasts in 1977.

For definitions and a brief description of the methods used to collect these data see Section V, Statistical Notes in Private and Public Investment, Intentions, (61-205), Annual.

D. II. Private and Public Investment in Canada, Revised Intentions (61-206), Annual

The matrices listed below contain series representing mid-year forecasts of capital expenditures. Repairs are not included since these data are not revised on our mid-year survey.

For information concerning our Actual, Preliminary Actual and Forecast data on CANSIM see Private and Public Investment in Canada, Intentions (61-205), Annual

The Canada matrices begin in 1956 with the following exceptions Mining (1192) - 1963, Government departments (1220) - 1968, Private and Public (1224) - 1968, Public (1228) - 1968.

The Provinces and Territories can be retrieved from 1968 (the first year these breakdowns were compiled). Beginning in 1977 these matrices also include data, split between the private and public categories.

For definitions and a brief description of the methods used to collect these data see Section V, Statistical Notes in the publication.

**MATRIX:0528**
**000528**

GROSS NATIONAL EXPENDITURE IN CONSTANT (1971) DOLLARS, ANNUALLY FROM 1926. - MILLIONS OF DOLLARS

NATIONAL INCOME &amp; EXPEND. ACCTS. STC 13-531 13-201

THE PERIOD 1926 TO PRESENT WAS DEFLATED IN FIVE TIME SEGMENTS. 1926-47, 1947-55, 1956-61, 1961-71 AND 1971 ON WITH PRICE INDICES BASED ON 1935-39, 1949, 1957, 1961 AND 1971. THE FIVE SERIES WERE THEN LINKED TO 1971 BASE. THE LINKING PROCESS PRODUCED RESIDUAL DIFFERENCES BETWEEN SUM OF THE LINKED GROUPS AND THE LINKED AGGREGATES. THESE DIFFERENCES ARE SHOWN IN THIS MATRIX AS ADJUSTING ENTRIES.

PUBL'D APPROXIMATELY 90 DAYS AFTER PREVIOUS QTR. HISTORICAL REVISIONS ARE BASED ON CHANGES TO DATA IN INDEX OF INDUSTRIAL PRODUCTION AND CAPITAL STOCK, AND ON THE OCCURRENCE OF NEW TURNING POINTS OR TROUGHS IN THE CAPITAL-OUTPUT RATIO. AGGREGATES ARE BUILT UP FROM COMPONENTS USING THE WEIGHTS OBTAINED FROM THE INDEX OF INDUSTRIAL PRODUCTION. DETAILS ON METHODOLOGY ARE PRESENTED IN THE BANK OF CANADA REVIEW MAY 1980. "MEASURING CAPACITY UTILIZATION: A TECHNICAL NOTE".					3.1	TOTAL FOREIGN CURRENCY-RESIDENTS OF U.S.A. - TOTAL	63-01-00	PU B	3611

## 001903

FARM INPUT PRICE INDEX, CROP PRODUCTION, 1981=100, QUARTERLY.

FARM INPUT PRICE INDEX (62-004), STC

FARM INPUT PRICE INDEXES MEASURE CHANGES IN PRICES OF COMMODITIES AND SERVICES USED IN FARM OPERATIONS. INDEXES ARE AVAILABLE ABOUT 45 DAYS AFTER END OF QUARTER. ANNUAL INDEXES AVAILABLE IN MATRIX 1913. INDEXES FOR ATLANTIC REGION AND PROVINCES MAY BE LESS RELIABLE THAN THOSE FOR EAST, WEST AND ALL CANADA.

FARM INPUT PRICE INDEX, ANIMAL PRODUCTION, 1981=100, QUARTERLY.

FARM INPUT PRICE INDEX (62-004), STC

FARM INPUT PRICE INDEXES MEASURE CHANGES IN PRICES OF COMMODITIES AND SERVICES USED IN FARM OPERATIONS. INDEXES ARE AVAILABLE ABOUT 45 DAYS AFTER END OF QUARTER. ANNUAL INDEXES AVAILABLE IN MATRIX 1914. INDEXES FOR ATLANTIC PROVINCES MAY BE LESS RELIABLE THAN THOSE FOR EAST, WEST AND ALL CANADA.

STC PRIX

RAW MATERIALS PRICE INDEX, 1977=100 MONTHLY				FLOWS AND STOCKS OF FIXED NON-RESIDENTIAL CAPITAL IN CANADA, 1970			
INDUSTRY PRICE INDEXES (62-011), STC				SIC ANNUALLY FROM 1926 FOR TOTAL MANUFACTURING AND NON-MANUFACTURING INDUSTRIES			
THIS INDEX MEASURES PRICE CHANGE OF RAW MATERIALS BOUGHT BY CANADIAN INDUSTRY. TIME BASE IS 1977=100. WEIGHTS WERE DERIVED FROM 1976 INPUT-OUTPUT TABLES. COMMODITY INDEXES ARE GENERALLY OF LESSER QUALITY THAN MAJOR COMPONENTS. ANNUAL MATRIX 2893.				FIXED CAPITAL FLOWS AND STOCKS (13-211), STC			
THE MEASUREMENT PROCEDURE IS THE "PERPETUAL INVENTORY METHOD". FOR CONCEPTS, METHODS AND SOURCES SEE CATALOGUES 13-522, 13-523, 13-543, 13-211 AND 13-568. THE ESTIMATES FOR THE TWO MOST RECENT YEARS ARE BASED RESPECTIVELY ON PRELIMINARY AND EXPECTED INVESTMENT EXPENDITURES.				STC CONS

CAPACITY UTILIZATION RATES IN CANADIAN MANUFACTURING BY QUARTERS

CAPACITY UTILIZATION RATES CAT. NO. 31-003 STC.

THE UTILIZATION RATES ARE GIVEN BY MAJOR GROUPS ACCORDING TO THE 1970 STANDARD INDUSTRIAL CLASSIFICATION. THE DATA GO BACK TO 1961 AND THE METHODOLOGY USED IS BASED ON CAPACITY CAPITAL-OUTPUT RATIOS. THE INDEX OF UTILIZATION FOR TOTAL MANUFACTURING IS DERIVED BY AGGREGATION USING THE 1971 GROSS DOMESTIC PRODUCT WEIGHTS. FOR CONCEPTS AND METHODOLOGY PLEASE REFER TO CATALOGUE 31-003

LAFAYETTE FIXED WEIGHTED IMPORT VOLUME INDEXES 1971=100 ON BALANCE OF PAYMENTS BASIS FOR TOTAL IMPORTS, 6 IMPORT COMMODITY SECTIONS, 61 COMMODITY GROUPINGS AND OTHER BALANCE OF PAYMENTS ADJUSTMENTS

SUMMARY OF EXTERNAL TRADE CATALOGUE NO. 65-001, STC

THE FIXED WEIGHTED IMPORT VOLUME INDEXES ARE DERIVED BY DIVIDING THE CURRENT VALUE BY THE CORRESPONDING PASCHER PRICE INDEXES. THE FIXED WEIGHTS ARE BASED ON 1971 PRICES AND THE INDEX REFLECTS CHANGES IN QUANTITIES ALONE. FOR FURTHER INFORMATION SEE THE DECEMBER 1976 SUPPLEMENT TO THE SUMMARY OF EXTERNAL TRADE CATALOGUE 65-001.

## 003585

MERCHANDISE EXPORTS ON A BALANCE OF PAYMENTS BASIS BY 64 MAJOR GROUPS AND BY 6 PRINCIPAL TRADING AREAS, BASED ON THE STANDARD COMMODITY CLASSIFICATION, IN MILLIONS OF DOLLARS.

SUMMARY OF EXTERNAL TRADE CATALOGUE NO. 65-001 STC

DATA POINTS IN THE MOST RECENT MONTH ARE PRELIMINARY DATA. DATA ARE PUBLISHED APPROXIMATELY 35 CALENDAR DAYS AFTER END OF REFERENCE PERIOD.

PAASCHE CURRENT WEIGHTED EXPORT PRICE INDEXES 1971=100 FOR TOTAL EXPORTS, 5 EXPORT COMMODITY CLASSIFICATION (XCC) SECTIONS AND 47 MAJOR GROUPINGS, 9 STANDARD INTERNATIONAL TRADE CLASSIFICATION (SITC) SECTIONS AND 6 BANK OF CANADA (B OF C) GROUPS AND 26 SUBGROUPS.

SUMMARY OF EXTERNAL TRADE CATALOGUE NO. 65-001 STC

THE PAASCHE CURRENT WEIGHTED EXPORT PRICE INDEXES REFLECT CHANGES IN BOTH WEIGHT AND PRICE. MOST OF THE NON-END PRODUCT INDEXES ARE BASED ON AVERAGE PRICES DERIVED FROM COMMODITY EXPORT VALUE AND QUANTITY DATA. THE END PRODUCT INDEXES ARE BASED ON CANADIAN INDUSTRY SELLING PRICE INDEXES FOR EXPORT PRICES. FOR FURTHER INFORMATION, SEE THE DECEMBER 1976 SUPPLEMENT TO THE SUMMARY OF EXTERNAL TRADE CATALOGUE 65-001.

MACHINERY AND EQUIPMENT PRICE INDEXES, BY INDUSTRY OF PURCHASE, 1971=100, QUARTERLY. AN EXPLANATION OF CONCEPTS, METHODS, SOURCES AND INDEX RATINGS IS CONTAINED IN "CONSTRUCTION PRICE STATISTICS-MACHINERY AND EQUIPMENT PRICE INDEXES BY INDUSTRY OF PURCHASE" CAT. NO. 62-552.							
CONSTRUCTION PRICE STATISTICS (62-007), STC							
INDEX RATINGS MAY CHANGE OVER TIME. CONSULT CAT NO. 62-007 FOR THE RATING HISTORY. THE RATING SHOWN HERE REFERS TO THE MOST RECENT COMPLETE YEAR'S DATA ONLY. A=ADEQUATE VALUE WEIGHTS & VARIETY PRICES. B=INADEQUATE VALUE WEIGHTS & PRICES. C=MAJOR GAPS IN WEIGHTS & PRICES (PROXY OR SURROGATE SERIES). D=MAJOR GAPS IN WEIGHTS & PRICES (SURROGATE SERIES OR PROXORATION). QUARTERLY SERIES IS SIMPLE AVERAGE OF MONTHLY DATA. THE LAST SIX MONTHS DATA IS SUBJECT TO REVISION. ANNUAL MATRIX 4040.

## PREFACE

CANSIM\* is Statistics Canada's computerized data bank and information retrieval service. It provides detailed and timely statistical information to economists, sociologists, statisticians, planners, analysts and academics in both the private and public sectors.

The CANSIM central facility is comprised of three database systems which may be accessed from anywhere in Canada by terminal. Business, economic and some social statistics are available in time series format on the Time Series Base. Economic and social statistics are available in cross-sectional format on the Cross-Classified Base (XCL); this format shows data in their multi-dimensional relationship with other data over time. Census Summary Data for a variety of geographic areas are available on the CANSIM Summary Data System (CSDS).

The Table of Contents and Index of this volume serve to identify, at a fairly aggregate level, the content of the CANSIM Main Base. The Main Base contains a wide variety of data relating to such topics as the System of National Accounts, Labour, Manufacturing, Construction, Trade Agriculture and Finance. As well, selected demographic and social data such as population estimates and vital statistics are available.

A new feature has been added to the Table of Contents to assist in the exploitation of the full range of CANSIM data holdings. For each section a cross reference list follows the content. The cross references point to related or similar data residing elsewhere within the Main Base and in the Cross Classified and Summary Data Bases.

---

\* CANSIM is an Official Mark of Statistics Canada.

When publishing any statistical data or text retrieved from CANSIM, the following credit should be used:

"Source: CANSIM - Statistics Canada".

# GUIDE TO USE OF THE TABLE OF CONTENTS, INDEX, AND DIRECTORY

An intrinsic property of the Time Series Main Base is that the data are organized according to a hierarchical structure - the highest level of which is the data matrix. Each of the approximately 5,000 matrices on the database contains individual series, which are related to each other in some coherent fashion. Each series represents a concept or variable for which data are stored across time.

The Main Base Series Directory, the large-volume, series level presentation of the database content, has as its primary level of aggregation the data matrix. Within it, matrices are simply ordered in ascending sequence and not placed in the context of subject matter categories. The Main Base Series Directory outlines, for each matrix, the Matrix Title and Note and, when applicable, the source publication for the data. For each constituent series, it provides the CANSIM series identification number, the databank number, start date, security status, and termination and metric conversion indicators-all in a format designed for easy reference.

The Index outlines the contents of the Directory by these matrices - specifically, as they are organized by broad subject categories. The link between the Index and the Main Base Series Directory is the matrix number.

The Table of Contents contains a brief description and a summary listing of the contents of each of the subject matter sections of the Index. As well, it provides cross references to additional sources within the CANSIM system for related data.

To determine whether data of interest are contained in the CANSIM Main Base, the user is encouraged to begin with a review of the Table of Contents. If the Table of Contents provides evidence that data of interest may be available, the user is directed to the pages of the Index which outline the matrices that might apply. Subsequently, matrices which are identified as warranting investigation of their component time series would form the basis for referring to the CANSIM Main Base Series Directory.

Inevitably, questions will arise about the actual data stored on the time series database questions about terminology, survey coverage, revision procedures, structural consistency, and so on. Such inquiries are, in most cases, best answered by the staff who actually conduct the surveys and produce the statistics; to accommodate users in this regard, an inquiries list appears as Appendix A of the Index.

Appendix B of the Index provides ranges, by subject or by source/publication, of the Databank Numbers that have been assigned to the time series on the database; as well, a tally of the number of series within each range is given.

To varying degrees, data disseminated on the CANSIM time series base may also be available in Statistics Canada publications. Appendix C lists these publications, and refers the user to the page(s) of this document which describe the corresponding matrices.

For information on the CANSIM Database System, and the services provided for its implementation and dissemination, please contact a User Services Representative in your nearest Statistics Canada Regional Office, or, alternatively, the Applications Consulting Services Section of the CANSIM Division, Statistics Canada, in Ottawa: Telephone (613) 990-8200 or (613) 990-8207.

## TABLE OF CONTENTS

I. SYSTEM OF NATIONAL ACCOUNTS AND CURRENT ECONOMIC ANALYSIS

The System of National Accounts provides a conceptually integrated framework for the systematic recording of activities within the Canadian economy.

The System consists of several parts. The Income and Expenditure Accounts provide a basic statistical picture of the key economic processes of production, income generation, sales to major markets, consumption, and capital formation. The Balance of International Payments data in their aggregate form constitute another part of the System of National Accounts. Structural details regarding industries and goods and services in current and constant dollars are portrayed in the Input-Output Tables of the system. Another part, Gross Domestic Product, provides constant dollar measures of the contribution of each industry to total Gross Domestic Product at factor cost. Aggregate productivity measures relate inputs to outputs, and the Financial Flow Accounts comprise the aggregate records of financial transactions.

Current Economic Analysis brings together selective indicators for evaluating the course and pattern of economic developments in Canada, and for comparing changes in these patterns between Canada and the United States.

## II. PRICES AND PRICE INDEXES

This section presents several measures of price levels and price movements. The most familiar item is the Consumer Price Index which is a measure of percentage change through time of the cost of a constant basket of goods and services representing the purchases made by a subset of the population in a specified time period. Also included in this section are the Industry Price Indexes for twenty major industries in the manufacturing sector. Construction Price Statistics contain price indexes of inputs into construction, contractors selling prices and special purpose aggregations of price indexes for construction machinery and equipment relating to specified categories of capital expenditures. Some specific price indexes are also presented as part of this section. The references point to other sections containing additional specific price indexes.

## III. LABOUR and INCOME

This section contains statistics on Employment, Unemployment, Labour Force Activity and Labour Income. The data originate from various sources. From a sample of approximately 51,000 households, the Labour Force Survey provides basic labour force characteristics data by sex, age, marital status and geographical areas. The Survey of Employment, Payroll and Hours, a mail survey of firms, institutions and organizations of all sizes, measures the levels and changes in employment, paid hours and earnings. These statistics are available at detailed industrial and geographic levels. The rest of the section contains statistics derived primarily from administrative sources and covers such topics as: labour income, wage developments from collective agreements, government employment, and unemployment insurance statistics.

#### IV. MANUFACTURING AND PRIMARY INDUSTRIES

This section contains measures of Industrial Production Activities from the Census of Manufacturers and includes items such as value of shipments and orders, employment, wages, and the cost of materials and supplies. Details are provided here for individual manufacturing industries as identified by the Standard Industrial Classification System, and are available at the Canada, region, and province level.

Some product data are also provided. These include motor vehicles, refinery products, gas and utilities.

#### V. CAPITAL AND FINANCE

This section provides data on the Financial Transactions of Industrial Corporations by size and industry as reflected on the balance sheets and statements of income, retained earnings, investments and capital expenditures. Statistics are derived from a quarterly survey of financial statements. Similar financial statistics covering Financial Institutions are also included in this section. Data on taxable income, income taxes and selected capital cost allowances for corporations are available for 37 major industries. There are also data on Government Finance, Employment and Payrolls.

Statistics derived from the application of the Corporations and Labour Union Returns Act (CALURA) include information on major financial characteristics, degree of concentration and foreign control.

For the first time, this section also contains the statistics used in the preparations of the Bank of Canada Review, mostly made up of data series on activities of financial institutions and financial markets and some general economic and international statistics.

## VI. CONSTRUCTION

Construction statistics cover a wide spectrum of data, from the measure of output of the construction industry at its most aggregate level (National Wealth and Capital Stocks) on through to its inputs (building materials) at a more detailed level. National Wealth and Capital Stock includes annual estimates of the stocks and flows of fixed non-residential capital in Canada, by major industries both in constant and current dollar valuation. Capacity Utilization Rates in manufacturing comparing output with capacity are available by major S.I.C. industry groups. Annual estimates of Capital and Repair Expenditures on construction for up to 70 different structure types, by province and industrial sector, are included. The results of the Investment Intentions Survey from about 24,000 respondents in Canadian businesses, institutions and governments provide the estimates for total outlays for construction and for acquisition of producers' machinery and equipment. Housing starts, building permits and shipments of building materials complete the offering.

## VII. MERCHANDISING AND SERVICES

The results from the Surveys of Retail and Wholesale Trade are presented here and include values of sales of goods by industry (S.I.C.) for Canada, values of sales of goods for some types of retail business by province, and department store sales and stocks by departments at the Canada level.

Other trade statistics covered in the section include summary statistics on direct selling, values of inventories of wholesales trade, and selected commodity-specific trade statistics.

Service Industry Statistics shown here include retail and consumer credit, receipts for restaurants, caterers and taverns, and detailed operating expenses (wages and salaries, employment) and revenues for the computer service industry.

## VIII. EXTERNAL TRADE

Statistics on international movements of commodities are presented in this section. The monthly values of imports and exports are broken down by commodities and individual countries or geographic regions. Monthly quantities traded, in specified units, are also available for selected commodities. Another group of matrices carry import and export price and volume indexes.

## XI. POPULATION

This section is made up of various Population Projections and Estimates, Vital Statistics and Immigration Data. Using different hypotheses regarding future and demographic trends, four series of population projections for Canada and the provinces are presented for the year 1976 to 2001. Also included are historical data from the Census of Population for census divisions and subdivisions. Current population estimates, immigration data, vital statistics, revised annual population estimates, interprovincial migration estimates and population for census metropolitan areas for 1976 to present complete this section.

Detailed Census of Population data with economic and social characteristics and geographical detail are presented in the Cross-Classified Table Directory and the CANSIM Summary Data System Directory.

#### XII. SELECTED OTHER STATISTICS

This section contains a selection of the data produced by the United States Departments of Commerce and Labor and by the provincial statistical offices of Alberta and Québec. For these two provinces, the data cover a broad range of measures of economic and social activities and characteristics within their respective borders.

Macro economic indicators for the United States including G.N.P., C.P.I., and Labor Force Activity, obtained from the U.S. Department of Commerce publication Survey of Current Business, are presented in this section. In addition, business indicators for the U.S. are available; they are obtained from the U.S. Department of Labor publication Business Conditions Digest.

C. Domestic Product by Industry

Canada

On a 1971 base, a continuous record from 1971 of Gross Domestic Product and Industrial Production and their components may be obtained from the following Statistics Canada publications:

Gross Domestic Product by Industry, (61-213), Annual

Gross Domestic Product by Industry, (61-005), Monthly

The same data are available in the following CANSIM matrices:

	MATRIX
Gross Domestic Product (including Industrial Production)	
Monthly: indexes in constant (1971) prices .....	1131
Quarterly: dollars in constant (1971) prices .....	1130
Annual - Gross Output, Intermediate Inputs and Gross Domestic Products:	
- Dollars in Current Prices .....	1125
- Dollars in Constant (1971) Prices .....	1126
- Indexes in Current Prices .....	1127
- Indexes in Constant (1971) Prices .....	1128
- Implicit Price Indexes .....	1129

For the period prior to 1971, selected annual data are available on a 1971 base. The data are available in the following CANSIM matrix:

Annual Historical Indexes of Real Domestic Product by Industry, 1971=100	389*
--	------

To obtain a continuous record on a 1971 base for industries not included in matrix 389, the index on a 1961 base must be mechanically rebased to 1971 by multiplying by 100 and dividing by the 1971 index value on a 1961 base. For 1971 and earlier years, Real Domestic Product, the Index of Industrial Production and the component indexes required for linking to the 1971 based series may be obtained from the following Statistics Canada publications:

Real Domestic Product by Industry, 1961 Base, (61-506), Occasional - for Real Domestic Product for the period 1935 to 1960 and for the Index of Industrial Production for the period from 1919 to 1960.

Real Domestic Product by Industry, 1961-1971 (1961=100), (61-516), Occasional - Revised estimates of Real Domestic Product (RDP) by industry for the 1961-1971 period on an annual and sub-annual basis as well as showing some previously unpublished data for the service-producing industries.

Data for series linkage purposes can also be obtained for 1971 and the period prior to 1971 from the following CANSIM matrices:

	MATRIX

E. International Travel, (66-002), Monthly

Note : Covers the period 1972 to date, monthly. Data prior to 1972 do not coincide with current definitions and methods of collection (refer to publication 66-201, annual, 1972 for a further explanation). Present methods of collection are described in catalogue 66-001.

- A. Number of international travellers entering and returning to Canada by type of transport.
- B. Number of non-resident travellers entering Canada by selected country of residence (excluding the USA).
- C. Number of vehicles travelling between Canada and the United States.

II. PRICES AND PRICE INDEXES

A. CONSUMER PRICE INDEX - REVISION BASED ON 1978 EXPENDITURES

Consumer Price Index - Updating Based on 1982 Expenditures

Beginning with January 1985 the Consumer Price Index (CPI) will be compiled using updated weights obtained from the 1982 Family Expenditure Survey. These weights will replace those derived from the 1978 Survey which were used in the CPI during the period April 1982 to December 1984.

To maintain the continuity of the series for the All-Items index for Canada and for published urban centres as well as for other indexes representing varying levels of aggregation, the indexes produced using the 1982 weights are linked (or chained) to their respective counterparts obtained from the 1978 weights. December 1984 marks the link month, or the point in time, in which comparable indexes are merged.

The time reference base continues to be 1981=100 except in cases of indexes that were initiated after that time. In particular, indexes for Whitehorse and Yellowknife will continue to be reported on a March 1982=100 time base. Victoria, the newest urban centre for which data will be published, will have a time base of December 1984=100.

Further details on the Consumer Price Index and related information may be obtained by dialling 613-990-9606 or by writing to the Unit head, Information and Current Analysis Unit,

#### B. Employment, Earnings and Hours, (72-002), Monthly

##### Survey of Employment Payrolls & Hours Monthly

#### A. Type of Data Aggregation

1. All Survey Units : Universe
2. Take - All Units :       Units which will always be in the sample.  
                                  Units with 200 or more employees.  
                                  Companies with more than one unit (multiple).  
                                  School Board.  
                                  Government Units.  
                                  Pre-selected Units.
3. Take-Some Units :       Units which are sampled and subject to change.  
                                  Units with less than 200 employees.  
                                  Companies with single unit.  
                                  Sample Units.  
                                  Does not include Government Units.

#### B. Types of Survey Estimates

1. All employees.
2. Salaried employees.
3. Employees paid by the hour.
4. Other employees.
5. Average weekly earnings (including overtime) of all employees.
6. Average weekly earnings (including overtime) of salaried employees.
7. Average weekly earnings (including overtime) of employees paid by the hour.
8. Average weekly earnings (including overtime) of other employees.
9. Average weekly earnings (excluding overtime) of all employees.
10. Average weekly earnings (excluding overtime) of salaried employees.
11. Average weekly earnings (excluding overtime) of employees paid by the hour.
12. Average weekly overtime earnings of all employees.
13. Average weekly overtime earnings of salaried employees.
14. Average weekly overtime earnings of employees paid by the hour.
15. Average weekly hours of salaried employees.
16. Average weekly hours of employees paid by the hour.
17. Average weekly overtime hours of employees paid by the hour.
18. Average hourly earnings of salaried employees.
19. Average hourly earnings (including overtime) of employees paid by the hour.
20. Average hourly overtime earnings of employees paid by the hour

### III. LABOUR - Continued

#### D. Major Wage Settlements, Quarterly

Information on major wage settlements is obtained from collective agreements settled in Canada during the quarter and covering 500 or more employees. The construction industry is excluded prior to 1983. The level of increase pertains to the base rate and includes estimated cost of living allowance (COLA) payments which are quantified by applying actual and/or projected increases in the Consumer Price Index to each COLA clause. (For technical notes see "Major Wage Settlements" - Quarterly).

##### All Industries

Effective Wage Increase in Base Rate for New Settlements:

##### MATRIX

- by industry	4049
- by duration of agreement	4052
- by effective period	4055

Number of Employees for New Settlements:

- by industry	4050
- by duration of agreement	4053
- by effective period	4056

Number of Agreements for New Settlements:

- by industry	4051
- by duration of agreement	4054
- by effective period	4057

##### Wage Developments

Information on wage developments is obtained from collective agreements in Canada, except those in the Construction industry which cover 500 or more employees.

##### All Industries Including Manufacturing & Commercial

Matrices 4041-4043 (Quarterly) contain data pertaining to settlements reached during the quarter, and indicate annual increases in base rates of pay over the life of the contract settled during the quarter.

##### MATRIX

Average annual percentage increases in base rates.....	4041*
Average annual percentage changes in base rates .....	4042*
Employees covered by new settlements in Collective bargaining .....	4043*

Matrices 4044-4047 (Quarterly) compares the annual increases for those arrangements settled with a COLA clause, and those which do not contain such a clause. Data are available from 1972.

Average annual percentage increases in base rates with a COLA clause .....	4044*
Employees covered by new settlements, with a COLA clause .....	4045*
Average annual percentage increases in base rates without a COLA clause .....	4046*
Employees covered by new settlements, without a COLA clause .....	4047*

Matrix 4048\* (Monthly) measures the trend in base rates of pay under all agreements currently in force since 1971. Monthly index numbers and annual percentage and cents per hour increases in base rates.

#### E. Estimates of Employees by Province and Industry, (72-008), Monthly

- Unadjusted for Seasonal Variations, .....	1714*
- Seasonally Adjusted, .....	1715*

#### F. Federal Government Employment, (72-004), Quarterly

~~These Matrices provide statistics on the number of~~

employees in, and payrolls of, general government and government enterprises.

General government and government enterprises:

number of employees as at the final day of the last pay period for the months of March, June, September and December and gross payrolls by

quarter, from 1956 .....

2717

## IV. MANUFACTURING AND PRIMARY INDUSTRIES

A. General Review of the Manufacturing Industries of Canada, Terminated, Canada only  
(31-203), Annual, 1961-1971 (1960 S.I.C.)

The concepts and definitions used are available upon request from the Regional Statistics Section, Manufacturing & Primary Industries Division.

Manufacturing industry data available in CANSIM have been compiled according to the criteria of the 1969 Census of Manufactures. Certain head offices which in earlier years have been classified at the industry group level have over time been included with those head offices classified at the individual industry level. Beginning with 1970, all head offices are classified at the industry level.

Series starting with a "5" have been terminated and are combined for all years with the corresponding industries in the series which begin with a "3". S.I.C. 107 is combined with S.I.C. 105. S.I.C.'s 1011, 1012 and 1013 are combined into S.I.C. 101. S.I.C.'s 1391 and 1392 are combined into S.I.C. 139. S.I.C. 3993 is combined with S.I.C. 3999.

The S.I.C. codes have been built into the series number in all cases.

## MATRIX

Manufacturing establishment - number .....	3300*

## IV. MANUFACTURING AND PRIMARY INDUSTRIES - Continued

Manufacturing Industries of Canada: National and Provincial Areas, (31-203), Annual Starts 1970 (1970 SIC), Canada and Provinces.

Principal statistics on individual Manufacturing industries and industry groups for Canada, it's regions and provinces as derived from the Census of Manufactures.

The data are compiled according to the 1970 revision of the "Standard Industrial Classification".

## MATRIX

Total Manufacturing - All industries .....	7481

## V. CAPITAL AND FINANCE

A. Industrial Corporations, Financial Statistics, (61-003), Quarterly

The quarterly financial statistics for Industrial Corporations from 1970 to the first quarter 1978 inclusive, which are in matrices 2781 to 2839, were terminated as of August 1978. This termination of matrices was caused by a major revision in the quarterly survey sample. You can have more information about this revision in the third quarter 1978 publication, Industrial Corporations, Financial Statistics - catalogue 61-003.

As of the third quarter 1978 you will be able to get the data created from that revision in a new block of matrices (6781 to 6845).

Data for 1962 to 1970 which were in matrices 2333 to 2780, have been deleted from the CANSIM base but have been retained on tape by the Industrial Corporations Section, Business Finance Division.

For Matrices 4781, 4782, 4785, 4786, 4789, 4790, 4800, 4801, 4863, and 4864 Series 8.1 is calculated by subtracting Series 6, 7, and 11 from Series 5.

In 1985 the values of all matrices 4780 - 4941 will be revised to be based on the 1982 benchmark year. Also at this time Real Estate matrices 4922 - 4927 will be deleted and values entered in the new Real Estate matrices 4937 - 4942. New series 1.6 of 4780 and 19.4 of 4781 will also receive values. Total Other, matrices 4792 - 4795, will be deleted. A major change will be the revision of Total All's matrices 4780 - 4783 to include the values of the two Real Estate Industries and Construction for 1977 - 1984.

<u>Federal Government Employment in Metro Areas, (72-205), Annual</u>	MATRIX
Federal government employment statistics: number of general government employees and regular payrolls in Census Metropolitan Areas for the month of September, commenc- ing from 1961.	2719
<u>Provincial Government Employment, (72-007), Quarterly</u>	
Provincial government employment statistics: number of employees and gross payrolls for general govern- ment and government enterprises, monthly from January 1970 to the present.	2722
<u>Local Government Employment, (72-009), Quarterly</u>	
Local government employment statistics: number of employees and gross payrolls for general govern- ment, monthly from January 1967 to the present.	2725
Number of municipalities, employees and gross payrolls in municipalities with population over 10,000 located in major urban areas over 50,000 in population, monthly from January 1967 to the present.	2726
<u>The Control and Sales of Alcoholic Beverages in Canada, (63-202), Annual</u>	
Revenue of all governments specifically derived from the control, taxation and sale of alcoholic beverages for fiscal years ended March 31, from 1950 to the present.	2728
Revenue of the Government of Canada specifically derived from the control and taxation of alcoholic beverages for fiscal years ended March 31, from 1950 to the present.	2729
Sales of alcoholic beverages by value and per capita 15 years and over for fiscal years ended March 31, from 1950 to the present.	2730
Sales of alcoholic beverages by volume and per capita 15 years and over for fiscal years ended March 31, from 1950 to the present.	2731
<u>Provincial Government Finance, Gross General Revenue and Expenditure for fiscal year ending March 31, Annual in millions of dollars.</u>	
Data originate from Provincial and Territorial Public Accounts and Budgets. However the application of Financial Management concepts is such, that differences exist between data presented in Public Accounts and Gross General Revenue and Expenditure. The nature of these adjustments can be determined by reviewing the reconciliation table in publication 68-207. In this table the years data identified as preliminary represent data formerly published in 68-205.

I. Corporations and Labour Unions Returns Act (CALURA), Annual, (61-210),

## Part I - Corporations

Major Financial Characteristics (sales, assets, equity, profits, and taxable income), and enterprise and corporation counts, for leading enterprises and totals, by control, by industry for each of the years from 1975, based on Table 1 and 6 in the published catalogue.

An enterprise is defined as a set of corporations under common control. Further information on the concepts and definitions used are available in the published catalogue, or may be obtained upon request from the Corporations Section, CALURA Sub-division, Business Finance Division. Detailed information on the corporations in specific enterprises may be found in Inter-corporate Ownership (catalogue 61-517 occasional).

1. The first set of matrices shows aggregate concentration (the leading 25, 100 and 500 enterprises) and the impact of foreign-controlled, Canadian private, and Canadian government enterprises. Leading enterprises were determined by aggregating sales of subsidiary corporations in non-financial industries. The impact of these leading enterprises within each of the nine industry divisions is also shown.

### A. National Wealth and Capital Stock

#### 1. 1970 SIC

These series represent annual estimates of the stocks and flows of fixed non-residential capital in Canada beginning with the year 1926. The data from 1926 are published in Fixed Capital Flows and Stocks, (13-568), occasional. Updates for the five most recent years are published in Fixed Capital Flows and Stocks, (13-211), annual.

The perpetual inventory method which underlies the present estimates starts with annual investment expenditures and estimates of the service lives of the assets. The capital stock estimates for a given year are obtained by accumulating past investment expenditures and adjusting them for the value of investment that has been used up (gross stocks) or adjusting them for the gradual wear and tear and the obsolescence they undergo during the time they are used (net stocks).

A comprehensive description of the perpetual inventory method is given in Fixed Capital Flows of the perpetual inventory method is given in Fixed Capital Flows and Stock - Manufacturing Canada 1926-1960: Methodology (13-522), Occasional.

The series are given by major industries according to the 1970 S.I.C., both in constant (1971) and current dollar valuation covering the following detailed types of components:

1. Building Construction
2. Engineering Construction
3. Machinery and Equipment
4. Capital Items Charged to Operating Expenses
5. Total Components

The component series are presented for the following categories of data:

1. Gross Fixed Capital Formation (GFCF)
2. Net Fixed Capital Formation (NFCF)
3. Capital Consumption Allowances (CCA)
4. Mid-Year Gross Stock (MYGS)
5. Mid-Year Net Stock (MYNS)
6. End Year Gross Stock (EYGS)
7. End Year Net Stock (EYNS)
8. Discards

#### Note:

The mnemonics appearing at the end of the series title of some 650 series in the Capital Stocks data block, serve to identify the component series of the CANDIDE model which is an undertaking of the Economic Council of Canada.

B. Capacity Utilization Rates In Canadian Manufacturing

The capacity utilization rates are given by major group according to the 1970 Standard Industrial Classification, by quarter from 1961.

The definition of capacity in this procedure is the maximum output obtainable under normal technological and market conditions.

The methodology used to produce these indexes is based on a comparison of the actual output of an industry during a certain time period with the estimated capacity output during that period.

The estimated capacity output is based on a capacity capital-output ratio derived from the industry's gross stock of fixed capital, measured in 1971 dollars. These capital stock estimates are produced by the National Wealth and Capital Stock Section of The Construction Division of Statistics Canada.

For concepts and detailed methodology, refer to Utilization Rates in Canadian Manufacturing, (31-003), Quarterly.

These indexes are available for the following list of industry levels:

1. Food and Beverages
2. Tobacco
3. Rubber and Plastics Products Industries
4. Leather
5. Textile
6. Knitting Mills
7. Clothing
8. Wood
9. Furniture and Fixtures
10. Paper and Allied Industries
11. Printing, Publishing and Allied Industries

C. Capital And Repair Expenditures On Construction

Source: Construction in Canada, (64-201) Annual. This series provides annual estimates of capital and repair expenditures on construction, broken down by some 70 different structure types, cross-classified by province and sector. Included are final, preliminary, and forecast data.

For the most part the data are based on the Statistics Canada surveys of Capital Expenditures. From the same source, another publication Private and Public Investment, (61-205), Annual, reports the total capital and repair expenditure program, including outlays on machinery and equipment.

Total Value of Construction Work Performed, Annual, in Thousands of Dollars

D. I. Private and Public Investment in Canada, Intentions (61-205), Annual

The matrices listed below contain series representing Actual, Preliminary Actual and Forecast data for Capital and Repair Expenditures. For Mid-Year Forecasts see Private and Public Investment in Canada, Revised Intentions (61-206), Annual. The actual matrices begin in 1956, the Preliminary Actual and Forecast begin in 1973. The last two years in Actual matrices are current Preliminary Actual and Forecast.

The matrices for the provinces and territories also include data split between the private and public categories for Actuals beginning in 1963, Preliminary Actuals in 1976 and Forecasts in 1977.

For definitions and a brief description of the methods used to collect these data see Section V, Statistical Notes in Private and Public Investment, Intentions, (61-205), Annual.

D. II. Private and Public Investment in Canada, Revised Intentions (61-206), Annual

The matrices listed below contain series representing mid-year forecasts of capital expenditures. Repairs are not included since these data are not revised on our mid-year survey.

For information concerning our Actual, Preliminary Actual and Forecast data on CANSIM see Private and Public Investment in Canada, Intentions (61-205), Annual

The Canada matrices begin in 1956 with the following exceptions Mining (1192) - 1963, Government departments (1220) - 1968, Private and Public (1224) - 1968, Public (1228) - 1968.

The Provinces and Territories can be retrieved from 1968 (the first year these breakdowns were compiled). Beginning in 1977 these matrices also include data, split between the private and public categories.

For definitions and a brief description of the methods used to collect these data see Section V, Statistical Notes in the publication.

F. Building Permits, (64-001), Monthly:

	MONTHLY	ANNUAL
Building Permits - By Type .....	129	851
- By Province .....	137	852

Matrix 443 contains monthly, unadjusted data, by category, (singles, cottages, doubles, rows, apartments, conversions and hotels), of all dwelling units created in Canada, by province and metropolitan areas.

	MONTHLY	ANNUAL
Building Permits .....	443	
Demolition of Residential Units, by province, metropolitan area and large urban area annual from 1968 .....		987

The series in matrix 991 provide monthly data in Urban Centres of 10,000 population and over by category; singles (including cottages), multiples (doubles, rows, apartments and conversions) and total. This monthly data, in dwelling units, is available adjusted for seasonality at monthly and annual rates in Matrix 80.

Matrix 994, these building permits provide the dwelling units by category (singles, cottages, rows, apartments and conversions) for the economic regions in Canada and the provinces. These series, unadjusted for seasonality, are updated monthly on a revised basis only.

- 74 -

## VI. CONSTRUCTION - Concluded

Matrix 995 contains the values of building permits, by category, in thousands of dollars, for all economic regions in Canada and the provinces. These series, as in Matrix 994 are reported monthly on a revised basis only.

## MATRIX

Building Permits in Centres of 10,000 Population and over, Dwelling units, by type, Canada and Provinces .....	989
Building Permits in Centres of 10,000 population and over, Dwelling Units .....	991
Building Permits by Economic Regions, Canada and Provinces, Dwelling Units .....	994
Building Permits by Economic Regions, Canada and Provinces, values..	995

Matrix 990 provides values for residential building permits, by type of structure (singles, cottages, doubles, rows, apartments & conversions) for Canada and the provinces. This data is unadjusted and updated monthly on a current and revised basis. Comparable units in Matrix 443 can be used for average costs.

K. Computer Service Industry, (63-222), Annual

Data are presented for companies primarily engaged in the computer services industry as well as for companies and institutions engaged in providing computer services to the public as a secondary activity. 1972 and 1973 data are comparable. In 1974 computer service companies were classified into two groups consisting of establishments primarily engaged in providing computer services and of establishments primarily engaged in sales and leasing or rental of EDP hardware.

The concepts and definitions used are available upon request from Merchandising and Services Division.

# XI. POPULATION

## A. Population Projections for Canada and the Provinces, 1976-2001 , (91-520), Occasional

These are Statistics Canada second generation of population projections for Canada and the provinces. They supersede the previous ones which were released in 1974. They are generated by the Statistics Canada Population Projection Model (SCPM) using different hypotheses regarding future trends in fertility, mortality, immigration, emigration and inter-provincial migration. Four series are presented here, from Projections 1 to Projections 4; the base population is the 1976 Census population by age and sex. More information about the general methodology and assumptions is given in Population Projections for Canada and the Provinces, 1976-2001 , (91-520), Occasional. Data by individual ages as well as components of growth are also contained in the Publication 91-520 as well as extensions of these projections at Canada level up to 2026.

# XI. POPULATION - Continued

## B. 1. POPULATION, CENSUS DIVISIONS & SUBDIVISIONS (historical)\*

The series comprises two tables. The first gives the population of the provinces and the territories back to 1901 Census as well as decennial increases. The second gives, for each Census taken since 1921, the population of the provinces, counties, census divisions, cities, towns, villages, municipalities and census subdivisions.

For a comprehensive description of boundary definitions pertinent to the census geographic areas tabulated refer to the source publications 1971 Census Catalogue 92-702, 1976 Census Catalogues 92-802, 92-803, 92-804, 92-805, and 1981 Census Catalogues 93-901 to 93-912.

## C. Population, 1921-1971, Revised Annual Estimates of Population by Sex and Age Groups, Canada and the Provinces , (91-512), Occasional

Revised Annual Estimates of Population by Sex and Age for Canada and the Provinces, 1971-1976 , (91-518), Occasional

Estimates of Population by Sex and Age for Canada and the Provinces , (91-202), Annual

For each year other than census years, Statistics Canada publishes, in Catalogue 91-202, postcensal estimates of the population by age and sex as of June 1, which are calculated by the component method on the basis of the results of the preceding census. After each census, the postcensal estimates are revised to produce intercensal estimates (formerly called "revised estimates") which are consistent with the results of the censuses immediately preceding and following the period under consideration. For the period from 1951 to 1976 inclusive, data for the years ending in "1" or "6" (e.g., 1951, 1956) are census counts and data for other years are intercensal estimates. The data for 1977 and 1978 are final postcensal estimates whereas those for 1979 are preliminary postcensal estimates.

13. Value of production and other receipts .....	4187
14. Total value added .....	4188
15. Number of establishments, employees and salaries in wood pulp industry .....	4143

Principal statistics of the manufacturing industries in Québec, by major industrial group and sub-group, for Québec as a whole, annual data since 1961

Note : The classification used for these matrices is the revised Standard Industrial Classification Manual of 1970. In order to obtain consistent chronological series from 1961 to 1972, some sub-groups have been aggregated to form a total of 157 industrial sub-groups. SIC codes have been integrated to series number in all cases. Basic data were taken from the Census of Manufactures tapes provided by Statistics Canada.
